

The Landscape Nerd: Day at the Farm

This is most of the information that I used- I do my best to account for all of the resources that I come across or have incorporated into the episode. If there is more information that you would like to see added to this list- Let me know and email me thelandscape nerd@gmail.com.

Janelle Soja is a multigenerational regenerative farmer based in Northeast Ohio. She was my first stop in trying to understand where agriculture starts and landscape architecture ends- especially in identifying ways to mitigate climate change impacts on the land. Both professions/sciences are curating the ways that people interact with landscapes and I believe that we have a lot that we can learn from one another. I hope that you enjoy this episode and learn as much as we did.

This is the list of resources that I found when I simply typed “landscape architecture and agriculture” into a search engine.
